

CDD's Professional Services

CDD's services **design**, **adapt**, and **evolve** the platform for your scientific research

CDD's Vision

CDD Vault transforms fragmented research data workflows into a unified, robust, and scalable informatics ecosystem — enhancing collaboration, data integrity, and accelerating scientific discovery.

Unified Data Ecosystem: Combines chemistry, biology, assays, inventory, ELN and analytics — eliminating fragmented spreadsheets and siloed databases.

Ease of Deployment & Use: Cloud-based SaaS — no server management, low IT overhead, simple onboarding, and intuitive UI usable by chemists & biologists alike.

Scalable & Secure: Enterprise-grade security, permission controls, compliance-ready, with scalability for small academic labs up to large pharma / CRO organizations.

Flexible & Customizable: Custom integrations, feature enhancements, dedicated support allow tailoring to project-specific workflows and compliance requirements.

CDD's Professional Services Overview

Trusted platform for 700+ clients

Domain expertise in research data management to serve as the connective tissue and complete the knowledge gaps that support your science

Data Migration

CDD's Data Services team accurately and securely migrates your research data ensuring nothing gets lost in translation.

We've helped organizations transition from legacy ELNs and LIMS to a collaborative, cloud-based environment.

Integration

Connect CDD Vault to your dashboards, analysis pipelines, or AI agents. Our team builds custom integrations for third-party software, instruments, and workflows. You can also use the well-documented API for command-line access and custom scripts.

Custom Features

We're always listening and recording your evidence. Leverage CDD professional services to prioritize enhancements for your ecosystem. Not only are we passionate about what we do, we're keen on supporting your vision.

Dedicated Resources

Give your team a dedicated technical expert who understands your scientific workflows, compliance requirements, and integrations. They accelerate adoption to get the most out of your investments.
