

Uploading Data for Public Access via CDD

Process for submitting data to CDD:

- Parties interested in publishing data should e-mail publish@collaborativedrug.com and provide an overview of the content
- CDD staff will review the data for quality, self-consistency, and technical relevance to the community
- If approved, CDD will provide instructions/directions on how to format data (Structured Data File or Comma Separated Values file)
- CDD may choose to provide a single two hour working session to advise on how to represent data for maximum impact
- Once data is received in the appropriate format, CDD will upload and publish the data for public access

Materials to be provided to CDD:

- Pre-organized CSV or SD File as per formatting instructions
- Descriptions for protocols to help other researchers understand the screens and related information associated with compounds

Use of the CDD platform to share data via CDD Public constitutes acceptance of [legal terms](#).

Private Vaults, collaborative Vaults (private to private), support, and additional services can be purchased ([contact us](#) for more information).
